

Event Information:

EventID :
52
Event Time :
Feb, 07, 2021, 04:24 AM
Rule :
SOC120 - Phishing Mail Detected - Internal to Internal
Level :
Security Analyst
SMTP Address :
172.16.20.3
Source Address :
john@letsdefend.io
Destination Address :
susie@letsdefend.io
E-mail Subject :
Meeting
Device Action :
Allowed

Analysis Steps:

Email logs were searched for the email which triggered the alert and it appears entirely benign. The only thing that may be worth considering is the time at which the email was sent being 04:24AM, it may be worth checking when these employees usually work. If this is an outlier then it may be worth further investigation.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a False Positive. It could be worth considering tuning detection logic to ensure that benign emails like this do not trigger alerts contributing to analyst alert fatigue.

Report:

Incident Summary

Analysis confirms a False Positive alert regarding an internal email communication. The system flagged a benign message sent between two internal employees. No malicious content, attachments, or links were present. However, an anomalous timestamp warrants a brief routine check to ensure the sender's account has not been compromised by an external actor operating in a different time zone.

Incident Details

- **Alert Name:** SOC120 - Phishing Mail Detected - Internal to Internal
- **Sender:** john[.]letsdefend[.]io
- **Recipient:** susie[.]letsdefend[.]io
- **Sender IP:** 172[.]16.20.3
- **Email Subject:** Meeting
- **Device Action:** Allowed

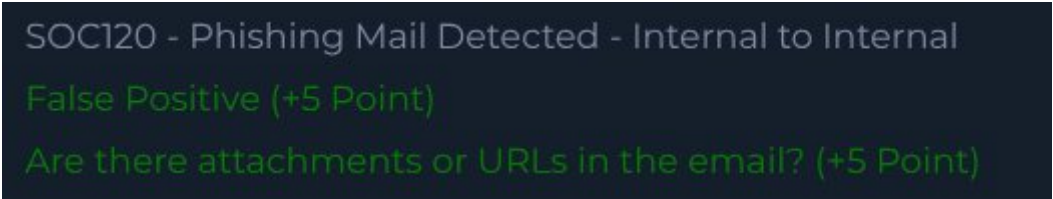

Analysis and Evidence

- **Content Review:** A review of the email logs and message body confirms it is standard, harmless internal correspondence. The sender simply asked, "Hi Susie, Can we arrange a meeting today if you are available?".
- **Threat Indicators:** The email contains no attachments, no embedded URLs, and uses no social engineering tactics.
- **Behavioural Anomaly:** The email was dispatched at 04:24 AM. While the content is benign, this unusual working hour warrants a secondary check against the employee's standard working patterns to rule out unauthorised account access.

Actions Taken

1. Analysed the email logs and extracted the message body for review.
2. Confirmed the absence of any malicious payloads or suspicious indicators.
3. Noted the anomalous 04:24 AM timestamp for potential follow-up regarding abnormal account activity.
4. Declared the alert a False Positive and closed the ticket.

Let's Defend Result

SOC120 - Phishing Mail Detected - Internal to Internal
False Positive (+5 Point)
Are there attachments or URLs in the email? (+5 Point)
