

Event Information:

EventID :
69
Event Time :
Feb, 28, 2021, 07:57 PM
Rule :
SOC133 - Suspicious Request to New Registered Domain
Level :
Security Analyst
Source Address :
172.16.15.78
Source Hostname :
KatharinePRD
Destination Address :
23.227.38.71
Destination Hostname :
amesiana.com
Username :
Leo
Request URL :
https://amesiana.com/
User Agent :
Mozilla/5.0 (X11; Ubuntu; Linux x86_64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/60.0.3112.101 Safari/537.36
Device Action :
Allowed

Analysis Steps:

Logs were searched with IP 172[.]16.15.78 as the source in the relevant time-frame yielding us the relevant event. The alert was triggered because the user accessed this newly registered domain hxxps://amesiana[.]com/.

The screenshot shows a security log viewer interface. At the top, a search bar contains the text "Source Address contains '172.16.15.78'". Below the search bar, it indicates "1 events (before Feb, 28, 2021, 07:57 PM UTC)". The main content area displays the details of the event in a table format.

Field	Value
type	Firewall
source_address	172.16.15.78
source_port	12332
destination_address	23.227.38.71
destination_port	443
time	Feb, 28, 2021, 07:57 PM
Raw Log	
Request URL	https://amesiana.com/
Request Method	GET

The offending domain/IP is not in our CTI database and is external to the organisation. No emails have been received indicating penetration testing involving the IP for the relevant time period. VirusTotal indicates it is a Canadian address associated with 23[.]227.38.71 AS 13335 (Cloudflare, Inc.). 0/91 security vendors flagged this IP address as malicious as of 3 days ago.

When browsing to the site in a sandbox it appears as though it is no longer online.

The screenshot displays a Windows 10 desktop environment. On the left, a web browser window is open to the URL <https://amesiana.com/>. The page shows a cloud icon and the message "Hmmm... can't reach this page". Below this, it says "Check if there is a typo in amesiana.com." and provides a "Refresh" button. The browser's address bar shows the URL and a search icon.

On the right, a network monitoring tool (likely Wireshark) is open, showing a list of network packets. The top section indicates "No threats detected". Below this, there are tabs for "Results", "CPU", and "Processes". The "Processes" tab is selected, showing a list of processes with columns for "Processes", "Browser Data", "Actions", and "beta". The list includes "Microsoft Edge" and "amesiana.com".

At the bottom, a taskbar is visible with the Windows Start button, a search bar, and several application icons. The system tray shows the time as 11:19 AM on 12/26/2024.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a False Positive.

Report:

Incident Summary

Analysis confirms a False Positive alert regarding an internal user accessing a newly registered domain. The user initiated a secure web request to an external site that, while recently created at the time, exhibits no malicious indicators across multiple threat intelligence platforms. The domain resolves to a legitimate content delivery network and is currently offline, posing no threat to the organisation.

Incident Details

- **Alert Name:** SOC133 - Suspicious Request to New Registered Domain
- **Target Host:** KatharinePRD (172[.]16.15.78)
- **User Account:** Leo
- **Destination Domain:** amesiana[.]com (23[.]227.38.71)
- **Device Action:** Allowed

Analysis and Evidence

- **Network Activity:** Firewall logs confirm that on Feb 28, 2021, at 07:57 PM, the host initiated a single outbound HTTPS GET request to the destination domain over port 443.
- **Connection Status:** The firewall permitted the traffic, allowing the internal endpoint to successfully communicate with the external server.
- **Dynamic Analysis:** Sandboxing attempts using AnyRun indicate that the domain is currently offline and unreachable, returning a DNS resolution error (DNS_PROBE_FINISHED_NXDOMAIN).

Threat Intelligence

- **Domain Reputation:** VirusTotal reports that 0/92 security vendors flag the domain amesiana[.]com as malicious.
- **Infrastructure OSINT:** The destination IP (23[.]227.38.71) is located in Canada and belongs to the Shopify Content Delivery Network (AS 13335).
- **IP Reputation:** VirusTotal shows 0/91 malicious detections for the IP address. AbuseIPDB lists 13 historical reports but maintains a 0% confidence of abuse score.

Actions Taken

1. Analysed firewall logs to verify the outbound connection from the internal endpoint to the newly registered domain.
2. Conducted OSINT analysis on both the domain and the hosting IP address, confirming no known malicious associations.
3. Attempted dynamic analysis, revealing the site is no longer active.
4. Declared the alert a False Positive and closed the ticket.
