

Event Information:

EventID :
21
Event Time :
Oct, 20, 2020, 09:36 PM
Rule :
SOC104 - Malware Detected
Level :
Security Analyst
Source Address :
172.16.17.41
Source Hostname :
GeorgProd
File Name :
5919600.doc
File Hash :
F46B0C39FCDF4C0426C9276A2BB48C6
File Size :
85.4 KB
Device Action :
Allowed

Analysis Steps:

Logs were searched with IP 172.16.17.41 (GeorgProd) as the source in the relevant time-frame yielding 2 events. The endpoint can be seen communicating with two external IPs. 75.188.96.231 (hxxp://75.188.96.231/neJIZRlu/3AanpZyfkiet/DyvSn/) and one which resolved to a Wordpress domain 67.209.122.240 ([hxxp://www.drleenasreedhar.com/wordpress/x/](http://www.drleenasreedhar.com/wordpress/x/)) which is often utilised by attackers as C2 via legitimate infrastructure.

The screenshot shows a security log viewer interface. At the top, a search bar contains "Source Address contains '172.16.17.41'" and a filter for "All Time". Below the search bar, it indicates "2 events (before Oct, 20, 2020, 09:36 PM UTC)". The main content area displays event details for a specific event. On the left, there is a sidebar with "INTERESTING FIELDS" and a list of fields: type, source_address, source_port, destination_address, destination_port, and raw_log. The main area shows the event details in a table format.

Field	Value

Code Insights

The provided macros do not exhibit any signs of malicious intent. Here's a detailed analysis of the macro behavior:
1. `!MacroAgent73a.Da11ygm4t5d-48unk`: This macro creates an instance of the `Word.Application` object and uses it to perform various operations on the active document. It inserts text, formats text, and applies styles to text. There are no suspicious or malicious actions performed by this macro.
2. `!Gosy7m7b4y4.N7v1u47t8H4pHy`: This macro is triggered when the document is opened. It inserts text, formats text, and applies styles to text. It also sets some macro security settings and enables/disables certain features in the Word application. While some of these actions may seem unusual, they are not inherently malicious and are

The first offending IP is not in our CTI database and is external to the organisation. No emails have been received indicating penetration testing involving the IP for the relevant time period. VirusTotal indicates it is a US address associated with 75[.]188.96.231 AS 10796 (Charter Communications Inc). 11/91 security vendors flagged this IP address as malicious as of 5 days ago.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a successful True Positive.

Report:

Incident Summary

Analysis confirms a True Positive alert for Emotet malware execution on the host GeorgProd (172[.]16.17.41). The malicious document, 5919600.doc, was allowed to execute on the endpoint. Proxy logs verify the execution was successful, showing immediate outbound traffic to a known Emotet botnet panel and a compromised WordPress domain.

Incident Details

- **Alert Name:** SOC104 - Malware Detected
- **Target Host:** GeorgProd (172[.]16.17.41)
- **Flagged File:** 5919600.doc
- **File Hash:** F46B0C39FCFDF4C0426C9276A2BB48C6
- **Device Action:** Allowed

Analysis and Evidence

- **Execution:** The device action confirms the malicious document was allowed to execute on the host.
- **Network Activity:** Proxy logs captured at 09:36 PM show the endpoint establishing outbound HTTP connections over port 80 to two external destinations:
 - 75[.]188.96.231 requesting `hxxp://75[.]188.96.231/neJlZRlu/3AanpZyfkiet/DyvSn/`.
 - 67[.]209.122.240 requesting `hxxp://www.drleenasreedhar[.]com/wordpress/x/`. This demonstrates the malware leveraging legitimate, compromised WordPress infrastructure to mask its C2 communications.

Threat Intelligence

- **OSINT (Payload):** VirusTotal definitively flags the .doc file as malicious (47/63 vendors). The analysis categorises it as Emotet malware and confirms the presence of malicious macro behaviour.
- **OSINT (Infrastructure - IP 1):** The first destination IP (75[.]188.96.231) is a US address flagged as malicious by 11/91 vendors. Crowdsourced context specifically identifies this URL as a hosting server for an Emotet botnet C2 panel.
- **OSINT (Infrastructure - IP 2):** While the IP 67[.]209.122.240 resolves to general WordPress hosting, the specific requested URL (`www.drleenasreedhar[.]com/wordpress/x/`) is flagged as malicious by 7/91 vendors.

Actions Taken

1. Verified the file hash via OSINT (VirusTotal), confirming it as an active Emotet macro-enabled payload.
2. Analysed proxy logs to confirm successful C2 communication with a known Emotet panel and a compromised WordPress domain.
3. Isolated the endpoint.
4. Declared the alert a True Positive for an active malware infection and escalated.

Let's Defend Result

```
SOC104 - Malware Detected
