

Event Information:

EventID :
31
Event Time :
Oct, 29, 2020, 07:55 PM
Rule :
SOC104 - Malware Detected
Level :
Security Analyst
Source Address :
172.16.17.82
Source Hostname :
JohnComputer
File Name :
Purchase-Order_NO.231101.exe
File Hash :
cdde99520664ac313d43964620019c61
File Size :
616.50 KB
Device Action :
Allowed

Analysis Steps:

Immediately the file name which would normally be associated with a document containing an exe extension is suspicious.

Logs were searched with IP 172.16.17.82 (JohnComputer) as the source in the relevant time-frame yielding 1 event. The endpoint can be seen communicating with a specific external IP 208.91.199.223 on port of 587 associated with SMTP.

Source Address contains "172.16.17.82" 2020-10-28

It is unclear from where the file was obtained but it being executed from the user's downloads folder indicates it was likely delivered by some means via the internet.

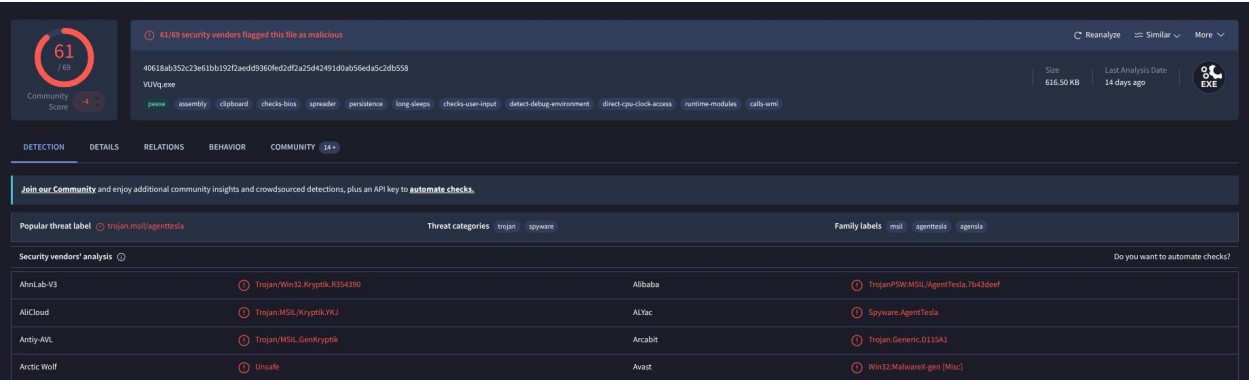

No Event Time No Process ID Purchase-Order_NO.231101.e... c:/Users/John/Downloads/P...

MD5: cdde99520664ac313d43964620019c61

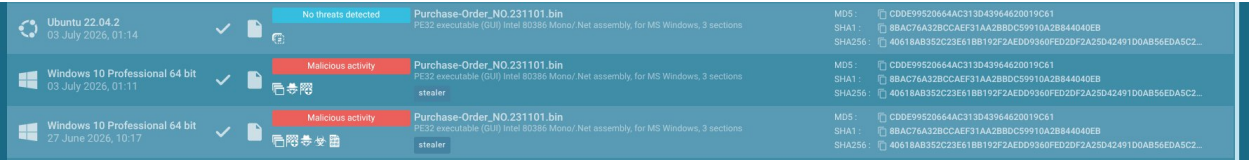

Size: 616.50 KB

Path: c:/Users/John/Downloads/Purchase-Order_NO.231101.exe

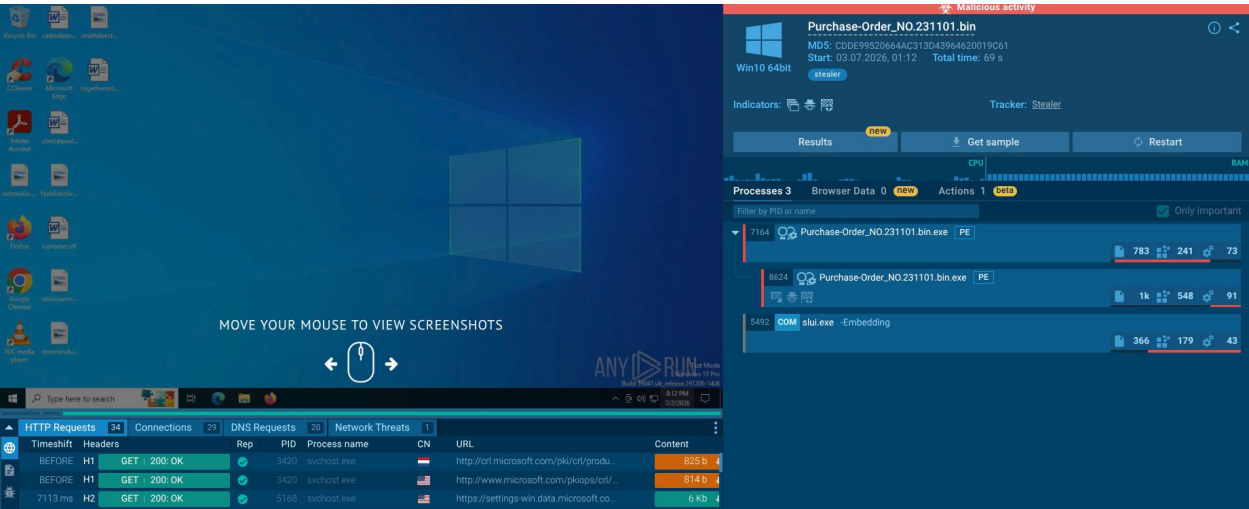

On VirusTotal the file is listed as malicious by 61/69 Vendors. Specifically it is categorised as Trojan Spyware.

On AnyRun we can see multiple reports. One of these reports determines that there is no malicious activity but this is within a Ubuntu Linux environment which it is very unlikely that the Malware targets.

On the Windows report the file is listed as “stealer” which verifies the Spyware categorisation which was seen on VirusTotal.

The offending IP is not in our CTI database and is external to the organisation. No emails have been received indicating penetration testing involving the IP for the relevant time period. VirusTotal indicates it is a US address associated with 208.91.199.223 AS 46606 (Unified Layer). 1/91 security vendors flagged this IP address as malicious as of 3 days ago.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a successful True Positive.

Report:

Incident Summary

Analysis confirms a True Positive alert for malware execution on the host JohnComputer (172[.]16.17.82). The malicious payload, Purchase-Order_NO.231101.exe, leverages social engineering by masquerading as a standard document. The device allowed the file to run from the user's Downloads directory, after which it successfully established an outbound connection to an external IP address over port 587.

Incident Details

- **Alert Name:** SOC104 - Malware Detected
- **Target Host:** JohnComputer (172[.]16.17.82)
- **Flagged File:** Purchase-Order_NO.231101.exe
- **File Hash:** cdde99520664ac313d43964620019c61
- **Device Action:** Allowed

Analysis and Evidence

- **Execution & Delivery:** The file was executed directly from c:/Users/John/Downloads/, strongly indicating it was delivered via the internet (likely as a phishing email attachment or malicious download). The filename intentionally uses a document-style naming convention to deceive the user.
- **Network Activity:** Firewall logs confirm that shortly after execution (08:06 PM), the endpoint successfully communicated with the external IP 208[.]91.199.223 over port 587.

Threat Intelligence

- **OSINT (Payload):** VirusTotal flags the file as definitively malicious (61/69 vendors) and categorises it as Trojan Spyware, specifically the AgentTesla family.
- **Sandbox Analysis:** AnyRun dynamic analysis of the file in a Windows 10 environment flags it for "Malicious activity" and verifies its function as an information "stealer".
- **OSINT (Infrastructure):** The destination IP (208[.]91.199.223) is a US-based address associated with Unified Layer (AS 46606). VirusTotal shows 1/91 vendors currently flagging it as malicious.

Actions Taken

1. Verified the file hash using VirusTotal and AnyRun, confirming it as an active AgentTesla info-stealer.
2. Correlated the payload execution with firewall logs showing outbound traffic over port 587.
3. Contained the endpoint.
4. Declared the alert a True Positive and escalated.
