

Event Information:

EventID :
36
Event Time :
Dec, 01, 2020, 10:23 AM
Rule :
SOC104 - Malware Detected
Level :
Security Analyst
Source Address :
10.15.15.18
Source Hostname :
AdamPRD
File Name :
Invoice.exe
File Hash :
f83fb9ce6a83da58b20685c1d7e1e546
File Size :
473.00 KB
Device Action :
Allowed

Analysis Steps:

Immediately the file name of Invoice.exe is suspicious.

Logs were searched with IP 10[.]15.15.18 as the source in the relevant time-frame yielding 1 event. We can see the endpoint reaching out specifically to an external IP 92[.]63.8.47.

The screenshot shows a search interface with the query "Source Address contains '10.15.15.18'" and a date filter for "2020-11-30". It indicates "1 Events (before Dec, 01, 2020, 10:30 AM UTC)". The event details are as follows:

Field	Value
type	Proxy
source_address	10.15.15.18
source_port	49832
destination_address	92.63.8.47
destination_port	443
time	Dec, 01, 2020, 10:30 AM
Raw Log	URL: http://92.63.8.47/

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a successful True Positive.

Report:

Incident Summary

Analysis confirms a True Positive alert for Maze ransomware execution on the host AdamPRD (10[.]15.15.18). The malicious payload, disguised as Invoice.exe, was allowed to run by the endpoint. Network telemetry verifies successful outbound communication to Turkish IP address which has been associated with the Maze ransomware family.

Incident Details

- **Alert Name:** SOC104 - Malware Detected
- **Target Host:** AdamPRD (10[.]15.15.18)
- **Flagged File:** Invoice.exe
- **File Hash:** f83fb9ce6a83da58b20685c1d7e1e546
- **Device Action:** Allowed

Analysis and Evidence

- **Execution:** The file name Invoice.exe uses a common social engineering lure to trick users into executing the binary. The device action confirms the payload successfully executed on the host.
- **Network Activity:** Firewall logs show the compromised host reaching out to an external IP (92[.]63.8.47) over port 443 at 10:30 AM, shortly after execution.

Threat Intelligence

- **OSINT (Payload):** VirusTotal definitively flags the executable as malicious (63/70 detections), explicitly categorising it as Maze ransomware. AnyRun sandbox testing validates this specific malware family classification.
- **OSINT (Infrastructure):** The destination IP (92[.]63.8.47) is located in Turkey (AS 44558). VirusTotal crowdsourced context identifies this address as known Command and Control infrastructure for Maze ransomware incidents, with 8/91 vendors currently flagging it as malicious.

Actions Taken

1. Verified the file hash using VirusTotal and AnyRun, confirming it as an active Maze ransomware payload.
2. Analysed network logs to confirm successful C2 communication with a known malicious external IP.
3. Contained the device.
4. Declared the alert a True Positive for an active ransomware infection and escalated.
