

Event Information:

EventID :
17
Event Time :
Sep, 22, 2020, 11:10 AM
Rule :
SOC106 - Found Suspicious File - TI Data
Level :
Security Analyst
Source Address :
172.16.17.150
Source Hostname :
ChanProd
File Name :
ChromeSetup.exe
File Hash :
1430438f19e3d3e2b375d127c68254ab
File Size :
63.65 MB
Device Action :
Cleaned

Analysis Steps:

Logs were searched with IP 172[.]16.17.150 (ChanProd) as the source in the relevant time-frame but no events were found indicating where the file came from.

The file is listed as clean on VirusTotal as of 3 days ago.

A report for the file can be found on AnyRun which states that there is suspicious activity but on analysis behaviour is consistent with a Google Chrome installer.

The screenshot displays the AnyRun web interface for analyzing a file named 'ChromeSetup.exe'. The interface is split into two main panels. The left panel shows a list of HTTP requests, with columns for 'Timeshift', 'Headers', 'Rep', 'PID', 'Process name', 'CN', 'URL', and 'Content'. The right panel, titled 'Suspicious activity', shows a list of processes and their actions, with columns for 'Process ID', 'Process name', 'Action', and 'Status'. The 'Processes' list includes 'GoogleUpdate.exe' and 'updater.exe'. The 'Suspicious activity' list shows various actions such as '/healthcheck', '/crash-handler -system', and '/handoff'. The interface also includes a search bar, a 'Type here to search' field, and a 'Filter by PID or name' dropdown.

On static analysis of the file there is information consistent with is being a legitimate file.

```

We can see metadata consistent with a legitimate Chrome Installer such as copyright of "2018 Google LLC".

At first the debug path of TEST_mi_exe_stub.pdb appeared suspicious. On further research it appears this is normal for Google Chrome. The "mi" seems to stand for mini_installer.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a False Positive.

Report:

Incident Summary

Analysis confirms a False Positive alert for a suspicious file on the host ChanProd (172[.]16.17.150). The flagged file, ChromeSetup.exe, is a legitimate Google Chrome installer. The device action was 'Cleaned', indicating the endpoint's security controls successfully blocked the installation attempt, but the file itself is not malware.

Incident Details

- **Alert Name:** SOC106 - Found Suspicious File - TI Data
- **Target Host:** ChanProd (172[.]16.17.150)
- **Flagged File:** ChromeSetup.exe
- **File Hash:** 1430438f19e3d3e2b375d127c68254ab
- **Device Action:** Cleaned

Analysis and Evidence

- **File Integrity:** All other metadata aligns with genuine Google software.
- **Threat Intelligence:** VirusTotal analysis confirms the file is clean, with 0/69 security vendors flagging it as malicious.
- **Endpoint Action:** The file was blocked and 'Cleaned' by the endpoint.

Actions Taken

1. Verified the file hash on VirusTotal, confirming a 0/69 clean detection rate.
2. Conducted static analysis via ExifTool. Noted strange debug symbols (TEST_mi_exe_stub.pdb), but verified this as benign.
3. Determined the alert to be a False Positive and closed.

Let's Defend Result

```
SOC106 - Found Suspicious File - TI Data
False Positive (+5 Point)
Analyze Malware (+5 Point)
Check if the malware is quarantined/cleaned (+5 Point)
