38
Event Time :
Jan, 01, 2021, 05:36 PM
Rule :
SOC108 - Malicious Remote Access Software Detected
Level :
Security Analyst
Source Address :
172.16.17.33
Source Hostname :
DanielPRD
File Name :
AnyDesk.exe
File Hash :
ff6bbddc34cbd33e2501872b97c4bacd
File Size :
2.85 Mb
Device Action :
Allowed

Analysis Steps:

Logs were searched with IP 172[.]16.17.33 (DanielPRD) as the source in the relevant time-frame yielding 2 events. Results show activity to the address 146[.]0.234.85 and domain of relay-61e0b722.net[.]anydesk.com.

Source Address contains "172.16.17.33" 2020-12-31

```

On running ExifTool on the file to extract metadata. Evidence was found to support this being a legitimate AnyDesk executable.

The output shows philandro Software GmbH. This is the actual, legitimate parent company that created and owns AnyDesk. The copyright dates and compilation timestamps align with a genuine release of the software from 2019. Malware trying to disguise itself as AnyDesk rarely fakes this specific metadata perfectly.

The domain accessed aligns with being a legitimate AnyDesk domain.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a False Positive.

Report:

Incident Summary

Analysis confirms a False Positive alert for malicious remote access software on the host DanielPRD (172[.]16.17.33). The alert was triggered by the execution of AnyDesk.exe and subsequent network communication with external infrastructure. Static analysis and OSINT telemetry confirm the executable is a legitimate, untampered AnyDesk binary, and the network traffic was routed to official AnyDesk relay servers. While AnyDesk is a dual-use tool, there is no evidence of malicious activity or payload tampering in this event.

Incident Details

- **Alert Name:** SOC108 - Malicious Remote Access Software Detected
- **Target Host:** DanielPRD (172[.]16.17.33)
- **Flagged File:** AnyDesk.exe
- **File Hash:** ff6bbddc34cbd33e2501872b97c4bacd
- **Device Action:** Allowed

Analysis and Evidence

- **Execution & Network Activity:** Firewall logs confirm 2 events where the host established outbound HTTP GET requests to 146[.]0.234.85 over port 80. The requested domain was relay-61e0b722.net[.]anydesk.com.
- **Static Analysis:** Because dynamic sandbox analysis yielded no results, ExifTool was used to extract the file's metadata. The internal metadata confirms the Company Name as philandro Software GmbH and shows valid compilation timestamps from September 2019, aligning with a legitimate software release.

Threat Intelligence

- **OSINT (Payload):** VirusTotal analysis confirms the AnyDesk.exe hash is clean, with 0/70 security vendors flagging it as malicious.
- **OSINT (Infrastructure):** Both the requested domain (relay-61e0b722.net[.]anydesk.com) and the destination IP address (146[.]0.234.85) return 0 malicious detections on VirusTotal. These indicators belong to standard, benign AnyDesk routing infrastructure.

Actions Taken

1. Verified the file hash via OSINT (VirusTotal), confirming a 0/70 clean detection rate.
2. Performed static analysis using ExifTool, validating the internal publisher metadata and timestamps as belonging to the legitimate AnyDesk vendor.
3. Reviewed network logs and OSINT, confirming all outbound traffic was safely directed to official AnyDesk relay servers rather than malicious C2 infrastructure.
4. Declared the alert a False Positive and closed.
