

Event Information:

EventID :
85
Event Time :
Mar, 22, 2021, 09:06 PM
Rule :
SOC109 - Emotet Malware Detected
Level :
Security Analyst
Source Address :
172.16.17.45
Source Hostname :
RichardPRD
File Name :
1word.doc
File Hash :
349d13ca99ab03869548d75b99e5a1d0
File Size :
188.95 Kb
Device Action :
Cleaned

Analysis Steps:

It is unclear how the malware made its way onto the device after searching both network and email logs for the relevant time-frame but as can be seen by the Device Action of Cleaned the malware failed to execute on the device. External intelligence sources clearly indicate that the file is malicious, specifically exploiting Word Document Macros and associated with the Emotet family.

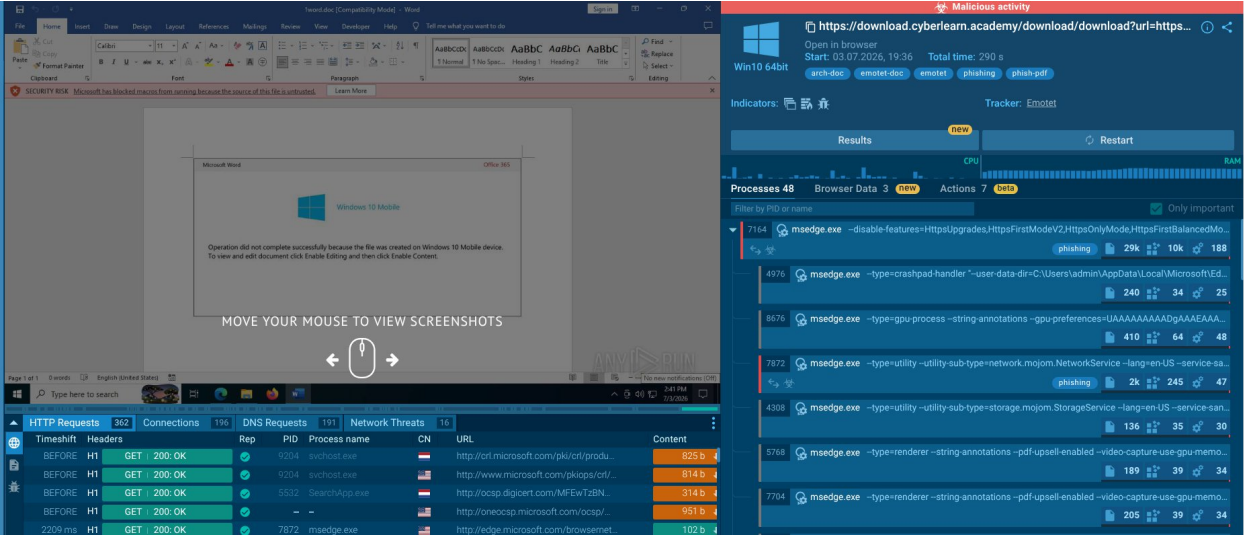

On VirusTotal 50/61 Vendors list the file as malicious.

The screenshot shows the VirusTotal analysis page for a file named '1word.doc'. The file's SHA-256 hash is d34849e1c97f9e15b3a7b807ca1f11e04a2b101405aa0159e3ff0c22d7bf. The file size is 188.95 KB, and it was last analyzed 3 days ago. The page indicates that 50/61 security vendors flagged this file as malicious. The file is categorized as a document (doc) with behaviors including calls wmi, auto-open, macros, obfuscated, long sleeps, detect debug environment, hide app, executes dropped file, and create file. The 'Code insights' section notes that the provided macros do not exhibit signs of malicious intent. The 'Crowdsourced AI' section shows a warning from Hipsaxec flags this file as malicious, stating that macros extracted from the document exhibit several signs of malicious intent. The 'Popular threat label' is 'trojan.w97m/emotet'. The 'Threat categories' are 'trojan', 'downloader', and 'dropper'. The 'Family labels' are 'w97m', 'emotet', and 'emotet'. The 'Security vendors' analysis' section shows results from Acronis (Static ML), AlCloud, and Antiy-AVL, all flagging the file as suspicious or malicious. The table below summarizes the security vendors' analysis:

Security vendors' analysis	Threat categories	Family labels
Acronis (Static ML)	Suspicious	AlmLab-V3
AlCloud	Dropper/MSOffice/EmotetWinMac0920...	ALYac
Antiy-AVL	Trojan/Downloader/MSOffice-Agent	Arcabit

It is listed as Emotet on AnyRun and can be observed as conducting malicious behaviours.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a failed True Positive.

Report:

Incident Summary

Analysis confirms a failed True Positive alert for Emotet malware on the host RichardPRD (172[.]16.17.45). The malicious file, 1word.doc, was detected, but the device action indicates it was successfully Cleaned before execution. Network and email logs did not reveal the initial delivery method.

Incident Details

- **Alert Name:** SOC109 - Emotet Malware Detected
- **Target Host:** RichardPRD (172[.]16.17.45)
- **Malicious File:** 1word.doc
- **File Hash:** 349d13ca99ab03869548d75b99e5a1d0
- **Device Action:** Cleaned

Analysis and Evidence

- **Execution Status:** The malware failed to execute on the device, as evidenced by the "Cleaned" device action.
- **Payload Behaviour:** Sandbox analysis via AnyRun observed the file conducting malicious behaviours and confirmed it as Emotet. The file specifically exploits Word Document Macros.

Threat Intelligence

- **OSINT:** VirusTotal analysis shows 50/61 security vendors list the file as malicious. External intelligence confirms association with the Emotet malware family.

Actions Taken

1. Verified the file hash against OSINT sources (VirusTotal and AnyRun) to confirm its malicious nature.
2. Checked endpoint, network, and email logs to determine execution status and initial delivery vector.
3. Confirmed the endpoint successfully cleaned the threat prior to execution.
4. Declared the alert a True Positive (Failed/Cleaned) and closed the ticket.

Let's Defend Result

SOC109 - Emotet Malware Detected

True Positive (+5 Point)

Check If Someone Requested the C2 (+5 Point)

Analyze Malware (+5 Point)

Check if the malware is quarantined/cleaned (+5 Point)
