

Raw Event Information:

EventID :
117
Event Time :
Feb, 27, 2022, 12:36 AM
Rule :
SOC167 - LS Command Detected in Requested URL
Level :
Security Analyst
Hostname :
EliotPRD
Destination IP Address :
188.114.96.15
Source IP Address :
172.16.17.46
HTTP Request Method :
GET
Requested URL :
<https://letsdefend.io/blog/?s=skills>
User-Agent :
Mozilla/5.0 (X11; Ubuntu; Linux i686; rv:24.0) Gecko/20100101 Firefox/24.0
Alert Trigger Reason :
URL Contains LS
Device Action :
Allowed

Analysis Steps:

Logs were searched with source IP 172[.]16.17.46 as the source and 188[.]114.96.15 as the destination in the relevant time-frame yielding 7 events. In this case the source address is from within our organisation's network and belongs to the host [EliotPRD]. These GET requests appear to be for benign webpages. All relating to the <https://letsdefend.io/> domain.

Country	United States of America
City	San Francisco, California

The gathered information was enough to determine that the current detection rules are over-aggressively tuned and in looking for command injection via keywords such as [ls] a rule was triggered by the word [skills] in the link:

[hxxps://letsdefend.io/blog/?s=skills]

Causing an alert to be generated.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a false positive.

Report:

Incident Summary

Analysis confirms False Positive command injection. Overly tuned detection rules caused an alert to be generated by 172[.]16.17.46 (EliotPRD) accessing the benign webpage 188[.]114.96.15 [hxxps://letsdefend.io/blog/?s=skills] due to the [ls] being present in the word skills.

Incident Details

- **Alert Name:** SOC167 - LS Command Detected in Requested URL.
- **Target Host:** 188[.]114.96.15 AS 13335 (Cloudflare, Inc.).

Analysis and Evidence

- **False Positive Confirmation:** There is no evidence of malicious activity and the associated domain is evidenced to be low-risk. It can be determined that the [ls] in [hxxps://letsdefend.io/blog/?s=skills] is what triggered this alert.
- **Behavioural Context:** Proxy logs during the relevant time-frame show a logical sequence of standard user behaviour, with the user navigating and reading multiple career-related blog posts sequentially. All requests resulted in standard HTTP 200 success responses with normal payload sizes, indicating no successful exploit or unexpected server directory leakage.

Threat Intelligence

- **OSINT:** The IP is not in our Threat Intel database. VirusTotal lists 0/91 security vendors flagged this IP address as malicious. AbuseIPDB lists this IP was reported 7 times with a 0% confidence of abuse.

Actions Taken

1. Declared False Positive.

Recommendation

Recommend tuning the detection rule SOC167 to look for stand-alone word boundaries or specific command execution syntax (e.g. [ls], [ls -]) rather than simple substring matching to reduce future alert fatigue.

Let's Defend Result
