Event Information:

EventID :
53
Event Time :
Feb, 07, 2021, 12:19 PM
Rule :
SOC121 - Proxy - Malicious Executable File Detected
Level :
Security Analyst
Source Address :
172.16.17.5
Source Hostname :
SusieHost
Destination Address :
89.40.172.121
Destination Hostname :
gavrilobtcapikey2884238984928.netsons.org
Username :
Susie
Request URL :
http://gavrilobtcapikey2884238984928.netsons.org/pianificazione.exe
User Agent :
Chrome - Windows
Device Action :
Blocked

Analysis Steps:

When attempting to navigate to the URL in a sandbox it appears that it is no longer online.

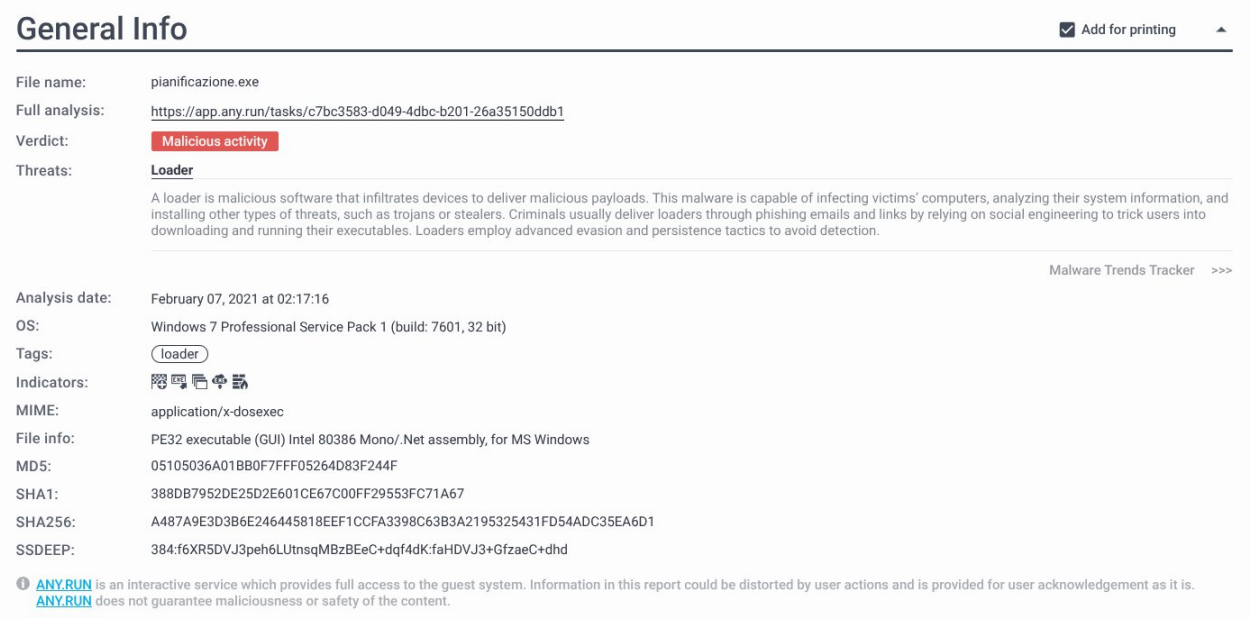

When researching the name of the file (It is Italian for “planning”) I was able to find an AnyRun analysis for it, proven by it making contact with the same URL seen in the alert.

File name:	pianificazione.exe
Full analysis:	https://app.any.run/tasks/c7bc3583-d049-4dbc-b201-26a35150ddb1
Verdict:	Malicious activity
Threats:	Loader

A loader is malicious software that infiltrates devices to deliver malicious payloads. This malware is capable of infecting victims' computers, analyzing their system information, and installing other types of threats, such as trojans or stealers. Criminals usually deliver loaders through phishing emails and links by relying on social engineering to trick users into downloading and running their executables. Loaders employ advanced evasion and persistence tactics to avoid detection.

ANY.RUN is an interactive service which provides full access to the guest system. Information in this report could be distorted by user actions and is provided for user acknowledgement as it is. ANY.RUN does not guarantee maliciousness or safety of the content.

As can be seen in the screenshot the file attempts to analyse system information and is used as a launch pad for installing further malware onto the system. This is likely after determining the most suitable attack vector based on the specific system.

The offending IP is not in our CTI database and is external to the organisation. No emails have been received indicating penetration testing involving the IP for the relevant time period. VirusTotal indicates it is a Italian address associated with 89[.]40.172.121 AS 60087 (Netsons s.r.l.). 2/91 security vendors flagged this IP address as malicious as of 10 days ago.

2 / 91 Community Score

2/91 security vendors flagged this IP address as malicious

On AbuseIPDB this IP was reported 1 time with a 0% confidence of abuse.

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a failed True Positive.

Report:

Incident Summary

Analysis confirms a failed True Positive alert triggered by an attempted download of a malicious loader executable. An internal user navigated to a suspicious Italian domain hosting the malware, but the network proxy successfully blocked the connection. No further action is required for the endpoint as the threat was neutralised at the perimeter.

Incident Details

- **Alert Name:** SOC121 - Proxy - Malicious Executable File Detected
- **Target Host:** SusieHost (172[.]16.17.5)
- **User Account:** Susie
- **Destination IP:** 89[.]40.172.121
- **Request URL:** http://gavrilobtcapikey2884238984928[.]netsons.org/pianificazione.exe
- **Device Action:** Blocked

Analysis and Evidence

- **Network Activity:** The user attempted to download a file named pianificazione.exe (Italian for "planning") via a Chrome browser.
- **Payload Identification:** AnyRun sandbox analysis identifies this specific file (MD5: 05105036A01BB0F7FFF05264D83F244F) as a malicious "Loader".
- **Malware Behaviour:** Loaders typically profile the victim's system and act as a launchpad to secretly install secondary malware, such as trojans or info-stealers, based on the specific environment.
- **Execution Status:** The proxy actively blocked the download attempt, preventing the executable from reaching the internal host and executing.

Threat Intelligence

- **Infrastructure OSINT:** The destination IP resolves to Netsons s.r.l. (AS 60087) located in Milan, Italy.
- **IP Reputation:** VirusTotal shows 2/91 security vendors flagging the IP as malicious, while AbuseIPDB shows a single report with 0% confidence.
- **Domain Status:** Sandbox testing confirms the malicious URL is currently offline and unreachable.
- **Internal Correlation:** There are no records of scheduled penetration tests involving this infrastructure, confirming it as hostile.

Actions Taken

1. Analysed proxy logs to confirm the attempted download of a suspicious executable.
2. Utilised AnyRun to positively identify pianificazione.exe as a known malicious loader.
3. Verified the proxy successfully blocked the web request, protecting the endpoint from compromise.
4. Declared the alert a failed True Positive and closed the ticket, as perimeter defences operated effectively.
