EventID :

Analysis Steps:

Logs were searched with IP 61[.]177.172.87 as the source and WebServer1004 IP 172[.]16.17.16 as the destination in the relevant time-frame yielding 5 events. The attacker can be seen attempting __ on the __ endpoint utilising

[ATTACK SCREENSHOTS]

The gathered information was enough to

The offending IP is not in our CTI database and is external to the organisation. No emails have been received indicating penetration testing involving the IP for the relevant time period.

VirusTotal indicates it is a Chinese address associated with 61[.]177.172.87 AS 4134 (Chinanet). 3/91 security vendors flagged this IP address as malicious as of __ days ago.

[VIRUSTOTAL SCREENSHOT]

On AbuseIPDB this IP was reported 86,681 times with a 0% confidence of abuse.

[ABUSEIPDB SCREENSHOT]

Based on following Playbook procedure and the analysis of available information, this alert is determined to be a successful True Positive.

Report:

Incident Summary

Analysis confirms a True Positive command injection attack against WebServer1004. An external threat actor successfully extracted confidential server information via the /video/ endpoint. The host has been contained and the ticket is escalated to Tier 2 for further review.

Incident Details

- **Alert Name:** SOC168 - Whoami Command Detected in Request Body
- **Attacker IP:** 61[.]177.172.87 AS 4134 (Chinanet)
- **Target Host:** WebServer1004 (172[.]16.17.16)
- **Attack Vector:** HTTP POST requests

Analysis and Evidence

- **Attack Execution:** The attacker used POST Parameters to conduct command injection [hxxps://172[.]16.17.16/video/].
- **Success Confirmation:** The server responded with HTTP Status 200 (Permitted) for all requests. HTTP Response Sizes varied. The commands can also be observed as having been run on WebServer1004 via its terminal history.

Threat Intelligence

- **OSINT:** The IP is not in our database. VirusTotal lists 3/91 security vendors flagged this IP address as malicious. AbuseIPDB lists this IP was reported 86,681 times with a 0% confidence of abuse.
- **Internal Correlation:** A review of internal communications confirmed no authorised Red Team testing scheduled involving any devices related to this alert in the relevant time-frame.

Actions Taken

1. Contained WebServer1004 to prevent further data exfiltration.
2. Declared True Positive.
3. Escalated to Tier 2 for impact assessment and remediation.
